Professional Summary

Motivated and self-driven aspiring Full Stack Developer with practical experience building applications and games while continuously expanding technical skills. Proficient in C#, Python, Java, JavaScript, HTML, SQL, Git, and C++, with a strong interest in web development, backend systems, and software engineering. Passionate about learning new technologies, writing clean code, solving problems, and contributing to collaborative development teams.

Technical Skills

Programming Languages

- Python
- Java
- C#
- C++
- JavaScript
- SQL
- HTML
- CSS

Frameworks & Technologies

- .NET
- ASP.NET (Learning)
- React (Learning)

Tools

- Git
- GitHub
- Visual Studio
- Visual Studio Code

- Unity
- Blender

Database

- SQL

Projects

Full Stack Development Projects

- Built and tested software applications while applying object-oriented programming principles.
- Created database-driven applications using SQL.
- Used Git and GitHub for version control and project management.
- Developed responsive web pages using HTML, CSS, and JavaScript.

Unity Game Development

- Developed games in Unity using C#.
- Implemented UI systems, gameplay mechanics, physics, events, and object-oriented programming concepts.
- Debugged and optimized code to improve performance.

Education

Self-Taught Software Developer

- Focused on Full Stack Development, Backend Development, and Game Development.
- Continuously learning through online courses, documentation, and personal projects.

Soft Skills

- Problem Solving
- Teamwork
- Communication
- Critical Thinking
- Adaptability
- Time Management
- Continuous Learning

Career Objective

To secure a Junior Full Stack Developer or Software Developer position where I can apply my programming knowledge, continue learning modern technologies, and contribute to building high-quality software solutions.
